

# SHEP Welding Fume and Metalworking Fluid Webinar

**Tuesday 9th March 2021  
12.00pm ending at 1.00pm**

**GoToWebinar – Hosted by BESA**

This webinar is designed to improve your ability to manage the health hazards from welding fume and metalworking fluids.

All welding fumes (including mild steel) are classed as carcinogens. Metalworking fluids can cause occupational asthma, occupational hypersensitivity pneumonitis and dermatitis.

HSE plans to inspect engineering premises from May to September 2021 – the main focus will be on welding fume and metalworking fluids.

The webinar will cover; a case study of an HSE investigation, the control measures required to protect the health of your workers, a summary of the fluid quality checks which must be performed on metalworking fluids and a Q&A session.

## **Speakers include:**

**Fiona McGarry**, H M Inspector of Health and Safety, Health and Safety Executive

**Matt Bloomer**, Technical Services Manager, Q8 Oils on behalf of UKLA

**Sarah Palfreyman**, H M Inspector of Health and Safety, Health and Safety Executive

## **Who should attend:**

The event is aimed at managers and directors in SME companies.
